

# Lab Seguridad

The screenshot shows the AWS GuardDuty console in a web browser. The top navigation bar includes the AWS logo, a search bar, and account information (United States (N. Virginia), Account ID: 6546-5447-8122, pablocastano6@gmail.com). The left sidebar contains the GuardDuty menu with options like Summary, Findings, Malware scans, Protection plans, Accounts, Usage, Suppression rules, Settings, Lists, What's New, and Partners.

The main content area is titled "GuardDuty Summary" and includes a "Summary" tab. Below the tab, there's a "Summary" section with a "View and analyze security trends based on GuardDuty findings in your AWS environment." message. The "Overview" section displays four key metrics:

- Attack sequences - new: 0
- Total findings: 1
- Resources with findings: 1
- Accounts with findings: 1

The "Findings" section shows a breakdown by severity:

- Critical: 0
- High: 0
- Medium: 0
- Low: 1

Below the findings, there are buttons for "Top threats" and "Top attack sequences only". The "Runtime Monitoring coverage" section includes a button to "Enable Runtime Monitoring". The "Most common finding types" section is partially visible at the bottom.

The bottom of the screen shows a macOS dock with various application icons, including Finder, Safari, and several communication apps.
