

Lab- organizations

The screenshot shows the AWS Organizations console. The top navigation bar includes the AWS logo, a search bar, and account information (Account ID: 6546-5447-8122, email: students/pablocastano6@gmail.com). The left sidebar has a menu with 'AWS Organizations' and 'Invitations'. The main content area is titled 'Management & Governance' and features a large heading 'AWS Organizations' with the subtext 'Centrally manage your multi-account environment as you scale your AWS resources'. Below this is a paragraph explaining the service. There are two red error boxes: 'You don't have permissions to access this resource.' and 'You don't have permissions to access this resource.' The 'About' section describes how AWS Organizations helps manage and govern the environment. The 'Pricing' section states 'There is no cost to use AWS Organizations.'

The screenshot shows the 'AWS accounts' page in the AWS Organizations console. The top navigation bar is the same as the previous screenshot. The left sidebar has a menu with 'AWS Organizations' and 'AWS accounts'. The main content area is titled 'AWS accounts' and features a heading 'Add an AWS account'. Below this is a paragraph explaining the accounts listed. There is a blue box with the text '2 requests to create AWS accounts have failed in the last 90 days.' and a button 'Enable in IAM'. The 'Organization' section includes a search bar and a table showing the organizational structure. The table has columns for 'Organizational structure' and 'Account created/joined date'. The structure is as follows:

Organizational structure	Account created/joined date
Root r-fgqt	
bootcamp ou-fgqt-lm7rxd9j	
OU-Security ou-fgqt-ufdnejr	
OU-Workloads ou-fgqt-glrms0h	

Supported policy types	
Policy type	Status
AI services opt-out policies AI services opt-out policies allow you to control data collection for AWS AI services for all the accounts in an organization. Learn more	⊖ Disabled
Backup policies Backup policies allow you to centrally manage and apply backup plans to the AWS resources across an organization's accounts. Learn more	⊖ Disabled
Bedrock policies Bedrock policies allow you to centrally manage configurations for Bedrock at scale across the accounts in an organization. Learn more	⊖ Disabled
